BOTSWANA
Qualifications Authority

PUBLIC NOTICE

INCLUSION OF NCQF QUALIFICATIONS IN THE ACQF QUALIFICATIONS AND CREDENTIALS PLATFORM

Botswana Qualifications Authority (BQA) informs qualification developers, Education and Training Providers (ETPs), learners, employers and the public that qualifications registered on the National Credit and Qualifications Framework (NCQF) will soon also be published on the African Continental Qualifications Framework (ACQF) Qualifications and Credentials Platform (QCP).

Established under the ACQF Project, the QCP provides a single trusted and authoritative source of information on qualifications across Africa. Botswana, through BQA, is among the African Union Member States participating in this initiative.

Publication on the QCP is intended to:

- Increase the continental and international visibility, comparability and transparency of Botswana's registered qualifications.
- Support the portability and recognition of skills and qualifications, as well as learner and labour mobility.
- Provide a foundation for digital credentials, learner records databases, micro-credentials, Recognition of Prior Learning (RPL) and data-driven skills intelligence.
- Promote harmonisation and interoperability of qualifications databases through common continental standards, while respecting national autonomy and contexts.

The qualifications to be published will include those registered under the names of individual ETPs. Publication on the QCP will have no financial implications for the ETPs concerned.

Any further information or requirements relating to this process will be communicated to the relevant organisations in due course.
